About me

Soon-to-graduate **Software Engineering student** (ICT Engineer) with practical coding experience from my studies and project work. Background as a **Biomedical Laboratory Scientist** in a 24/7 clinical laboratory environment, providing strong understanding of healthcare workflows.

Seeking a **junior software developer** role in healthcare-focused software development to apply and further develop my programming skills.

Experience

IT Trainee
Fimlab Laboratoriot Oy, 5/2025 – Present

Working in the IT department supporting user management and helpdesk requests (Jira). Participated in several projects combining knowledge from my laboratory experience and current studies, gaining experience in IT processes and collaborative teamwork. Received positive feedback for fast onboarding, efficient task completion and precise, high-quality work.

Biomedical Laboratory Scientist, haematology 24/7
Fimlab Laboratoriot Oy, 1/2020 – (Permanent, currently on study leave)

Main tasks included haematology analyses and blood sampling (TAYS campus and Acuta/ER). Working in the central laboratory provided understanding of the healthcare section and its processes. The role developed the ability to work under pressure in a 24/7 environment and communicate effectively with other healthcare professionals. I consistently received feedback on my precision and how I was always up to date.

Programming languages and technologies

Strong: React, TypeScript, Node.js, Express, SQL (MySQL, PostgreSQL), Git, Figma
Basic: C++, Java, Kotlin, React Native, Jetpack Compose, Qt/QML, Python

Strengths

- Problem solving & analytical thinking
- Fast learner & curiosity for deep understanding
- Precision and reliability

Education

Software Engineer (226op/240op)
Tampere university of Applied Sciences, 2023 – Present

Biomedical Laboratory Scientist
Tampere university of Applied Sciences, 2016 – 2019
